

Uniform quantization

$$L = 5, \quad b_i = \frac{i}{L}, \quad r_i = \frac{i + 1/2}{L}$$

$$Q_u(x) = r_i \quad \text{for } x \in [b_i, b_{i+1})$$

Non-uniform quantization

$$g(x) = \frac{\ln(1 + \mu x)}{\ln(1 + \mu)}, \quad \mu = 6$$

$$b_i = g^{-1}\left(\frac{i}{L}\right) = \frac{(1 + \mu)^{i/L} - 1}{\mu}$$
